Summary	Post-Master's student at EURECOM specializing in offensive security, with a background in telecommunication engineering. Experienced with web and binary exploitation and Active Directory attack paths. Holder of eJPT and PT1 certifications, seeking a 6-month Red Team or Application Security internship starting February 2026.			
Education	<b>EURECOM</b> Security in Computer Systems and Communications International institution accredited to deliver a specialized engineering degree (post-master) in digital security and communications.	<b>2024 - 2026</b> Post Master's degree		
	<b>SUP'COM</b> ICT Engineering Recognized among Tunisia's top engineering schools and leading in telecommunications education.	<b>2022 - 2024</b> National Engineering Degree		
	<b>Preparatory Institute for Engineering Studies - El-Manar (IPEIEM)</b> Math and Physics Ranked in the top 5 % nationally in the entrance exam for engineering schools.	<b>2020 - 2022</b> Pre-Engineering Diploma		
Experience	<b>KPMG Tunisia</b> Summer Intern <ul style="list-style-type: none"><li>Assisted the IT department with network troubleshooting and user privilege management within the Active Directory (AD) environment.</li><li>Resolved technical issues for end-users and supported the implementation of secure access controls.</li></ul>	<b>July 2023 - September 2023</b> Tunis, Tunisia		
	<b>IEEE Tunisia Section (Remote)</b> Summer Intern <ul style="list-style-type: none"><li>Processed and labeled 10 000+ receipt images to train computer-vision models for automated document verification.</li><li>Trained and evaluated CNN-based classification models to detect mislabeled or fraudulent receipts.</li></ul>	<b>June 2023 - September 2023</b> Tunis, Tunisia		
Projects	<b>Red-Team RAT (Discord C2) — Personal project</b> <ul style="list-style-type: none"><li>Developed a remote access tool (RAT) for red-team simulation using the Discord API as a command-and-control channel.</li><li>Implemented modular features for remote command execution and file transfer in a controlled lab environment for detection engineering purposes.</li></ul>	<b>August 2025</b>		
	<b>LLM-Based Deepfake Detection (ASVspoof Challenge)</b> <ul style="list-style-type: none"><li>Built an audio deepfake detection pipeline leveraging Wav2Vec2 and DistilBERT for spoofed-speech classification.</li><li>Benchmarked performance across multiple attack types from the ASVspoof dataset to evaluate model robustness.</li></ul>	<b>March 2025 – July 2025</b>		
	<b>Pentest Home Lab</b> <ul style="list-style-type: none"><li>Designed a virtualized penetration-testing lab with Windows AD and Linux vulnerable hosts (Metasploitable 2/3).</li><li>Practiced credential harvesting, Kerberos abuse, and lateral movement using tools such as BloodHound and Evil-WinRM.</li></ul>	<b>February 2025</b>		
	<b>Zero-Knowledge SNARK Implementation</b> <ul style="list-style-type: none"><li>Implemented a zero-knowledge proof system in Rust, applying the Fiat–Shamir transform for non-interactive verification.</li><li>Demonstrated end-to-end construction of a zk-SNARK pipeline from polynomial commitment to proof validation.</li></ul>	<b>October 2024 – January 2025</b>		
Skills	<b>Offensive Security</b> Web Exploitation, Binary Exploitation, Network Exploitation, Active Directory Attacks, Privilege Escalation, Detection Evasion	<b>Tools &amp; Frameworks</b> Evil-WinRM, Burp Suite, Metasploit, Nmap, Wireshark, BloodHound, Ghidra, IDA Free, Docker, Git	<b>Programming Languages</b> Python, C++, C, PHP, Rust, Java	
Certifications	<b>CPTS - Certified Penetration Testing Specialist</b> Hack The Box	<b>Ongoing</b>		
	<b>Junior Penetration Tester (PT1)</b> TryHackMe	<b>June 2025</b>		
	<b>E-learn Security Junior Penetration Tester (eJPT)</b> INE	<b>March 2025</b>		
	<b>Certified in Cybersecurity (CC)</b> ISC2	<b>February 2025</b>		
	<b>TOEIC</b> ETS	<b>March 2024</b>		
Languages	<b>English</b> C2	<b>French</b> C1	<b>German</b> A1	<b>Arabic</b> Native
